Portfolio: mandyhartman.dev

Frontend-focused software engineer with 4+ years building and shipping production web and mobile applications in React, React Native, TypeScript, Remix/React Router, and Next.js. Comfortable owning work end to end, from technical approach and architecture through release. Currently a software engineer at Virtu Studios, where I build the studio's flagship product and ship client work across web and mobile, including engagements with Dell.

EXPERIENCE

Virtu Studios · Software Engineer

Jun 2022 – Present

- Build and ship the studio's flagship product (launching summer 2026), a ShapeUp-methodology project management tool for small teams, contributing across the React, Next.js, Remix / React Router, and TypeScript front end and shaping component architecture and UI patterns.
- Deliver production web and mobile client projects end to end, scoping requirements, defining the technical approach and timelines, and shipping releases in React, React Native, and TypeScript while remaining hands-on in the codebase.
- Partner on enterprise and institutional engagements including Dell and Alba Enterprises (launching summer 2026), translating client needs into engineering plans and driving launch readiness from pitch through delivery.
- Founded Black Mountain College Yearbook (later acquired) and Heron Studio, an animal-welfare initiative; shipped products across web, iOS, and Android (see Selected Projects below).
- Founded Visual Archives (2023 to 2024), a nonprofit providing pro bono engineering consulting to museums and universities including University of Chicago and Clemson; managed engagements from intake through delivery.

Sports Card Investor · Software Engineer

Jan 2025 – Dec 2025

- Built and maintained features across high-traffic web and mobile products in React, Next.js, and TypeScript (web) and React Native / Expo (mobile).
- Led a cross-platform tech-debt initiative: scoped the work, sequenced delivery, managed team workload, and reported progress to executive sponsors.
- Drove design-system consistency and UI/UX direction across products, and partnered closely with product, design, and C-suite stakeholders to translate priorities into engineering plans.

Jenzabar · Software Engineer III

Nov 2023 – Sep 2024

- Led front-end modernization of chatbot and analytics tools (React, TypeScript, Material UI), improving usability and performance across enterprise applications.
- Reduced code complexity by 70% during a major refactor, improving load speeds and developer velocity.
- Established and led an accessibility working group, achieving WCAG compliance and embedding inclusive-design practices into the team's development workflow.
- Collaborated with AI teams to integrate LLM-based automation into student-facing interfaces.

University of South Florida · UX Researcher

Aug 2020 – Dec 2021

- Designed and ran user-research protocols around archival collection discovery; synthesized qualitative findings into design recommendations that drove product pivots and helped secure continued grant funding.

Earlier Career Decade of project-based work across museums and archives, spanning collections systems, vendor and budget management, and public-facing digital deliverables. Clients included Asheville Art Museum, National Crime Museum, Exhibits Development Group, and Blowing Rock Art & History Museum. Details on request.

SELECTED PROJECTS

Black Mountain College Yearbook *Public digital archive, founder & sole developer · acquired 2024* bmcyearbook.org

Public digital archive of Black Mountain College. Founded and built solo; sourced and validated 10,000+ records across multiple institutional collection holders. Acquired by BMC Museum & Art Center (2024).

Stack: Remix, TypeScript, Sanity CMS

Bramble *Wildlife rehab tracking, solo developer & designer*

bramblerehab.com

Patient-management app for individual wildlife rehabbers to track the animals in their care. Sole developer and designer across web and mobile. Web and iOS are live; Android is in closed testing.

Stack: React, Remix, TypeScript, Tailwind CSS, shadcn/ui (web); React Native (mobile)

Owen *Pet health records, solo developer & designer*

virtu-studios.com/work/owen

Mobile app for pet owners to keep vet records in one place, with reminders for vet visits, grooming, and other care events. Sole developer and designer. Launched on iOS and Android (summer 2025).

Stack: React Native (iOS and Android)

Juniper *Wildlife rehab wiki, co-built with one engineer*

juniper.wiki

Reference platform for wildlife rehabbers: care guides, an animal-identification aid, and a shop for rehab supplies. Built with one collaborator; live.

Stack: React, Remix, TypeScript, Tailwind CSS, shadcn/ui

EDUCATION

M.S., Computer Science · Clemson University

Expected Dec 2027

Coursework: AI-Receptive Software Development; Design & Analysis of Algorithms; Bias in Technology; Digital Humanities.

M.Sc., Library & Information Science · University of South Florida

2021

Magna Cum Laude · Database Management, Cultural Heritage Preservation through Technology.

B.A., Liberal Studies · Florida International University

2016

Cum Laude · Digital Art, Web Design, Art History.

Certificates & Training Project Management, University of Colorado (2026); Python 3 Programming, University of Michigan (2026); React, React Native, and UI/UX bootcamps (2022–2024); Kent C. Dodds advanced React and Remix workshops (2024).

SKILLS

Frontend React, React Native, Next.js, Remix / React Router, TypeScript, JavaScript, Tailwind CSS, Expo, Sanity CMS

Backend & Data Node.js, Python, SQL, REST APIs

Cloud & Tools AWS, Azure, Git, Firebase, Google Analytics, Firebase Analytics

Practices Agile/Scrum, ShapeUp, Kanban, Roadmap Planning, A/B Testing, WCAG Accessibility, Code Review, Cross-functional Stakeholder Communication
