

Mandy Hartman

UX Engineer - mandyhartman.dev

mandyhartmandev@gmail.com * (434) 906-2696 * linkedin.com/in/hartmandy * github.com/hartmandy

UX Engineer who **designs and builds**, closing the gap between design intent and production code. 10+ years in design and 4+ years shipping web and mobile applications in React, React Native, TypeScript, Remix, and Next.js. I work across the full arc: UX/UI design and prototyping, accessible component-driven front-ends, and contributing to the design systems that keep them consistent.

EXPERIENCE

UX Engineer

Virtu Studios

Jun 2022 - Present

Remote

- Lead UX engineering for the studio's flagship SaaS product, owning the path from design concept to production interface; architecting the front end, building design systems, and shipping the UI from concept through Summer 2026 launch.
- Translate product and design requirements into polished, accessible front-end interfaces, bridging design intent and engineering execution across web and mobile. (React, Typescript, React Native)
- Design and build end-to-end product experiences for independently developed products, spanning UX/UI design, prototyping, front-end engineering, and post-launch iteration.
- Partner directly with agency clients to define requirements, prototype solutions, and ship production releases across web and mobile; including the Market Movers web platform (NextJS, React) and two production mobile apps (React Native, Expo); Alba Enterprises e-commerce site (launching summer 2026); Dell cybersecurity platform; can share more upon request.

Frontend Engineer (Engineer III)

Jenzabar

Nov 2023 - Sep 2024

Remote

- Led front-end modernization of enterprise chatbot and analytics tools using React, TypeScript, and Material UI, redesigning student-facing interfaces to improve usability and performance.
- Reduced front-end code complexity ~70% through major refactoring of legacy components, improving load performance and developer velocity.
- Drove an accessibility initiative that brought products to WCAG compliance and embedded accessibility standards into the team's engineering workflow and design system.
- Partnered with AI/ML teams to design and integrate LLM-based features into student-facing interfaces, shaping the UX for early generative-AI adoption in the product.

UX Engineer, UX Researcher

BMC Yearbook

Nov 2023 - Sep 2024

Remote

- Founded and built a digital archival platform aggregating 10,000+ validated records across institutional collections, owning the product end to end from research and UX design through front-end engineering and launch.
- Designed the discovery and search experience for navigating large-scale archival collections, translating user-research insights into the interface and information architecture.
- Engineered the full front end (React, TypeScript, Remix), building a responsive, accessible interface for browsing and validating records.
- Acquired by BMC Museum & Art Center, with the platform adopted into their institutional collections infrastructure.

UX Researcher

University of South Florida

Aug 2020 - Dec 2021

Remote

- Designed and conducted user research on archival discovery workflows, translating qualitative insights into product and UX recommendations that shaped design direction and supported continued grant funding.
- Synthesized user behavior patterns and stakeholder input into actionable findings that guided improvements to digital archival systems.

UX Designer & Developer

Independent, Contract

Jan 2011 - Dec 2022

Remote/ Hybrid

- Independent design and development practice serving clients across cultural, educational, and commercial sectors, spanning UX/UI design, front-end development, and large-scale information systems.
- Designed and built responsive websites and interfaces, owning projects from research and design through development, launch, and ongoing maintenance.

- Built and maintained information systems and metadata schemas serving thousands of records, ensuring data integrity and structure across large digital collections (including work with the Asheville Art Museum, Penland School of Craft, Appleton Museum of Art, and etc.).
- Led digitization and information-architecture initiatives across multiple organizations, coordinating with technical, curatorial, and executive stakeholders to publish collections online.

Marketing & Communications Director

Blowing Rock Art & History Museum

May 2015 - Aug 2019

Hybrid, then Remote

- Led design and visual communications across the institution, producing marketing collateral, web content, and exhibition materials, and shaping a consistent visual identity.
- Designed and maintained web and digital content, coordinating with staff and external partners to keep public-facing materials current and on-brand.
- Progressed from visitor services and collections roles into marketing leadership, spanning design, communications, and public engagement.

EDUCATION

M.S., Computer Science · Clemson University

Currently pursuing

AI-Receptive Software Development; Design & Analysis of Algorithms; Bias in Technology (PhD); Digital Humanities (PhD)

M.Sc., Information Science · University of South Florida

2020 - 2021

Magna Cum Laude · Information Architecture, Database Management, Digital Preservation, User Discovery Systems

M.A., Design · University of Florida

2018 - 2019

Magna Cum Laude · Digital Media, Digital Curation & Educational Tools

B.A., Design · Florida International University

2015 - 2017

Cum Laude, Tau Sigma Honors · Digital Art, Web Design, Art History

PERSONAL PROJECTS

Bramble Wildlife *rehab tracking, solo developer & designer*

bramblerehab.com

Patient-management app for individual wildlife rehabbers to track the animals in their care. Sole developer and designer across web and mobile. Web and iOS are live; Android is in closed testing.

Stack: React, Remix, TypeScript, Tailwind CSS, shadcn/ui (web); React Native (mobile)

Juniper Wildlife *rehab wiki, co-built with one engineer*

juniper.wiki

Reference platform for wildlife rehabbers: care guides, an animal-identification aid, and a shop for rehab supplies. Built with one collaborator; live.

Stack: React, Remix, TypeScript, Tailwind CSS, shadcn/ui

Owen *Pet health records, solo developer & designer*

virtu-studios.com/work/owen

Mobile app for pet owners to keep vet records in one place, with reminders for vet visits, grooming, and other care events. Sole developer and designer. Launched on iOS and Android (summer 2025).

Stack: React Native (iOS and Android)

TECHNICAL SKILLS

Design UX/UI design, prototyping (Figma), design systems & component libraries, wireframing & information architecture, user research & usability testing, responsive & accessible (WCAG) interfaces

Engineering React, React Native, Next.js, Remix / React Router, TypeScript, JavaScript, Tailwind CSS, Expo, Storybook, Sanity CMS, Node.js, Python, SQL, REST APIs, Jest & testing libraries

Tools & Process Figma, Git, CI/CD pipelines, AWS, Azure, Firebase, Google Analytics, A/B testing, Agile/Scrum, ShapeUp, Kanban, roadmap planning, code review, cross-functional stakeholder communication
