Frontend-focused software engineer with 4+ years building production web and mobile applications in **React**, **React Native**, **TypeScript**, **Remix**, and **Next.js**. Currently Software Engineer at Virtu Studios, shipping the studio's flagship project management product and supporting enterprise engagements.

Virtu Studios

Software Engineer

Remote

Jun 2022 - Present

- Engineer for the studio's flagship SaaS product, leading architecture, full-stack development, product design, and roadmap execution from concept through Summer 2026 launch.
- **Owned end-to-end delivery** of independently developed products, spanning product strategy, UX/UI design, full-stack engineering, deployment, and post-launch iteration.
- Delivered custom software projects across **web and mobile platforms**, partnering directly with clients to define requirements, scope technical solutions, and ship production releases.
- Supported business development and enterprise engagements through client discovery, technical proposals, project estimation, and delivery planning, including work with Dell.
- Founded and launched a digital archival platform aggregating 10,000+ validated records across institutional collections, resulting in acquisition by a museum organization.
- Operate across **engineering, product management, design, and client-facing responsibilities** within a small studio environment.

Sports Card Investor

Frontend Engineer

Remote

Jan 2025 - Dec 2025

- Partnered with product and executive leadership to **translate business priorities into technical direction** for web and mobile products, influencing roadmap decisions and engineering execution. Contributed to strategic product and architecture decisions as a technical partner across engineering, design, and leadership teams.
- Led a cross-platform technical debt initiative across web and mobile, defining scope, sequencing delivery, and coordinating engineering efforts to improve maintainability and system stability.
- Drove **consistency across design system** and UI implementation for high-traffic web and mobile products, improving product cohesion and reducing UI fragmentation; utilizing React, Next.js, Typescript, React Native, Expo.

Jenzabar

Frontend Engineer (Engineer III)

Remote

Nov 2023 - Sep 2024

- Led front-end modernization of enterprise chatbot and analytics tools using React, TypeScript, and Material UI, improving usability and system performance across student-facing applications.
- Reduced front-end code complexity by ~70% through major refactoring of legacy components, improving load performance and developer velocity.
- Established and **led an accessibility initiative** that brought products to WCAG compliance and integrated accessibility standards into engineering workflows.
- Partnered with AI/ML teams to integrate LLM-based features into student-facing interfaces, enabling early adoption of generative AI workflows in the product.

University of South Florida

Frontend Engineer (Engineer III)

Remote

Aug 2020 - Dec 2021

- Designed and **conducted user research** on archival discovery workflows, translating qualitative insights into product and UX recommendations that influenced design direction and supported continued grant funding.

- **Synthesized user behavior patterns** and stakeholder input into actionable findings used to guide improvements in digital archival systems.

Previous Career *Digital Archivist & Collections Specialist*

2012 - 2022

Museum and cultural heritage digital projects spanning collections systems, research and copy for exhibitions, web and graphic design, and **creation of public-facing digital experiences**. Clients included Asheville Art Museum, National Crime Museum, Exhibits Development Group, Appleton Museum of Art, Continuum Art, and Blowing Rock Art & History Museum.

EDUCATION

M.S., Computer Science · Clemson University

Expected Dec 2027

Coursework: AI-Receptive Software Development; Design & Analysis of Algorithms; Bias in Technology; Digital Humanities

M.Sc., Information Science · University of South Florida

2020 - 2021

Magna Cum Laude · Database Management, Cultural Heritage Preservation through Technology

M.A., Design · University of Florida

2018 - 2019

Magna Cum Laude · Digital Media, Digital Curation & Educational Tools

B.A., Design · Florida International University

2015 - 2017

Cum Laude, Tau Sigma Honors · Digital Art, Web Design, Art History

Certificates & Training Project Management, University of Colorado (2026); Python 3 Programming, University of Michigan (2026); React, React Native, and UI/UX bootcamps (2022–2024); Kent C. Dodds advanced React and Remix workshops (2024).

PROJECTS

Black Mountain College Yearbook *Public digital archive* - Remix, TypeScript, Tailwind CSS, shadcn/ui, Sanity CMS

Public digital archive of Black Mountain College. Founded and built; sourced and validated 10,000+ records across multiple institutional collection holders. Acquired by BMC Museum & Art Center (2024). <https://www.bmcyearbook.org>

Bramble *Wildlife rehab tracking* - React, Remix, TypeScript, Tailwind CSS, shadcn/ui, React Native, Expo

Patient-management app for individual wildlife rehabbers to track the animals in their care. Sole developer and designer across web and mobile. Web and iOS are live; Android is in closed testing. <https://www.bramblerehab.com>

Owen *Pet care management* - React Native, Expo, Firebase

Mobile app for pet owners to keep vet records in one place, with reminders for vet visits, grooming, and other care events. Sole developer and designer. Launched on iOS and Android (summer 2025). <https://www.virtu-studios.com/work/owen>

Juniper *Wildlife rehab wikis* - React, Remix, TypeScript, Tailwind CSS, shadcn/ui

Reference platform for wildlife rehabbers, featuring care guides and an animal-identification aid. <https://www.juniper.wiki>

TECHNICAL SKILLS

Frontend React, React Native, Next.js, Remix / React Router, TypeScript, JavaScript, Tailwind CSS, Expo, Sanity CMS

Backend & Data Node.js, Python, SQL, REST APIs

Cloud & Tools AWS, Azure, Git, Firebase, Google Analytics, Firebase Analytics

Practices Agile/Scrum, ShapeUp, Kanban, Roadmap Planning, A/B Testing, WCAG Accessibility, Code Review, Cross-functional Stakeholder Communication
